

Glenelg Health and Wellbeing Profile

This spreadsheet is a collation of data sets which have been selected as measures to illustrate how the municipalities of the Great South Coast are faring in relation to the health and wellbeing of their community. The data represents:

- the most recent, publicly available data for each measure.
- indicators or data sets which are consistently available across the five LGAs.

It should be noted that some of the data presented are 'indicators' (ie not from whole of population surveys) and are subject to the validity

Key:	Performing best in region and/or better than Victorian Average	Please note: where an indicator is not considered to be 'good' or 'bad' no coding is applied (ie judgments/generalisations have been avoided)
	Performing worst in region and/or worse than Victorian Average	
	All LGAs performing worse than Victorian Average	
	Not an outlier relative to Victorian average but may be an issue	

				Great South Coast
